Seed Descriptions

Wild birdseed mixes attract ground-feeding birds such as mourning doves, juncos and sparrows:

- *Gourmet Mix*: contains millet, sunflower, safflower and thistle.

Sunflower seed is the best all-around food, favored by a wide variety of birds:

- *Black Oil Sunflower*: smaller than the striped, with thinner shell, more kernel and higher oil content; preferred 2:1 over other seed by most feeder birds.
- *Sunflower Chips*: the heart of the seed, virtually no hull, no mess, and more meat per pound.
- *Striped Sunflower*: many common feeder birds, such as cardinals, jays, grosbeaks, titmice, chickadees, sparrows and finches, as well as squirrels, like this larger, thicker shelled seed.

Specialty feed:

- *Nyjer (Thistle)*: especially good for goldfinches and pine siskins, this seed is rich in nourishing oil.
- *White Millet*: favored by ground feeding birds such as juncos, towhees, buntings and sparrows.
- *Safflower*: most squirrels don't care for it, but many birds such as cardinals, grosbeaks and juncos do.
- *Peanuts*: a favorite of woodpeckers, titmice, chickadees, nuthatches and blue jays.
- *Corn*: keep the squirrels busy with corn on the cob to keep them away from your feeders.
- *Suet*: the high fat content helps birds stay warm in the winter.
